User-friendly, easy to maintain, cost-effective

In today's industries there is a growing demand for handling materials quickly, efficiently and at low cost.

SILVER LINE is a range of reliable and cost-effective clamps suitable for applications in many industries, particularly where lift truck operators require attachments having simple performance and low cost.

The bale clamp and fork clamp ranges include capacities and openings suitable to cover the majority of material handling requirements.

Long life and long service intervals

- Combination of proven and high tensile aluminium profiles with new wear resistant plastic inserts.
- No wear on aluminium profiles.
- Symmetrical borings in aluminium profiles and symmetrical plastic inserts.
- Higher sliding speed with lower grease requirement.

Simple and quick exchange of wear parts

- Plastic bushings inserted from the side without removing clamp arms.
- Aluminium profiles with commercial hexagonal bolts, no special tools required.

Cost-effective: a new clamp at the price of a used one

- High volume production of dedicated range of capacities and openings resulting in manufacturing savings.
- New cost-effective components – such as aluminium profiles, cylinders and wear parts – and optimized manufacturing processes.

Bale Clamp Model LC-G

Commonly used for handling pulp and waste paper bales in the paper industry, as well as for bales of cotton, wool, tobacco, fabrics and other bales materials.

- Robust design for heavy-duty applications. Optimized weight and lost load allow high residual capacity of forklift
- High tensile aluminium profiles, reversible and interchangeable with wear resistant plastic inserts, allow long life and low lifetime cost.
- Adjustable pressure relief for opening/closing for internal hydraulics protection and sideshift function for flexible operation.
- Block valve in the middle for precise arm synchronism
- Excellent visibility for safe handling.

LC-G Model

Pallet Fork Clamp Model LC-H

Versatile attachment, it can be used to lift all conventional pallets, as fork positioner, or to clamp unpalletised loads.

- Robust design for heavy-duty applications. Optimized weight and lost load allow high residual capacity of forklift.
- High tensile aluminium profiles, reversible and interchangeable with wear resistant plastic inserts, allow long life and low lifetime cost.
- Block valve in the middle for precise arm synchronism.
- Adjustable pressure relief for opening/closing for internal hydraulics protection and sideshift function for flexible operation.
- Excellent visibility for safe handling.
