Easy-FORK Vision Systems

Fork mounted side camera

DESIGNED FOR ALL FORKLIFT TRUCKS

ROBUST DESIGN BOLZONI FORKS, AVAILABLE IN DIFFERENT SECTIONS AND LENGTHS

Easy-FORK Vision Systems significantly increase safety in the storage areas

The high quality fork mounted side camera is a great help to the forklift truck driver during loading, unloading and warehousing operations, in particular when moving pallets at high levels on shelves.

Thanks to the camera position, the driver can have a clear view on both forks, with a horizontal 52° viewing angle, while maintaining the correct ergonomic position on the seat.

Camera images are displayed on a 7 inch. monitor installed inside the driver cabin. The connection between camera and monitor can be wireless (standard) or through a reinforced cable and cable-reel.

Easy-FORK are factory and aftersales solutions, available in customized and adapted configurations (cable reel as option).

BOLZONI
