Push Pulls

BOLZONI

Productivity, flexibility, safety

Products of every kind are being handled on slipsheets instead of wooden pallets. Slipsheets are being used in various industries such as food, beverage, glassware, building materials, agricultural, paper, chemical, hardware and the automotive parts industry.
Bolzoni has the solution to all your slipsheet handling needs. A complete range of Push Pulls engineered and designed for today's most demanding applications. The Dedicated Push Pull for the customer using exclusively slipsheeted loads and the Easy Rider Fork-Mounted Push Pull for operations requiring slipsheets on an intermittent or part time basis.

Features:

- Wide windows in the push plate and gripper jaw allows for excellent visibility in both retracted and extended positions when clamping the slip-sheet.
- 4 degrees tilting faceplate, when fully extended, helps prevent any damage to the product.
- Gripper jaw is actuated by two cylinders, assuring a perfect force distribution on the clamping bar to help prevent any damage to the slipsheet.
- Hydraulic system protected with steel cover and plastic wire wrapping.
- Pressure relief valve guarantees structure and load protection.
- The vertical position of the pad is adjustable should the pad become worn or damaged, resulting in less maintenance costs.
- Rubber-surfaced gripper bar for better slipsheet clamping.
- Pantograph actuated by two cylinders for better distribution of pushing and pulling forces.
- Grease fittings in pantograph mechanism group.
- Platens manufactured in high tensile steel, for stronger and thinner structure.
- Chamfered platen corners prevent tears in the slipsheet and damage to the product.
- Noiseless handling thanks to design optimization and end stroke shock absorber.

Dedicated Push Pull

A Dedicated Push Pull enables you to handle, ship and store a wide variety of boxed, bagged, unboxed, cylindrical or rolled goods using slipsheets.
The results are lower pallet costs, reduced pallet handling labor and pallet returns, and higher payloads.

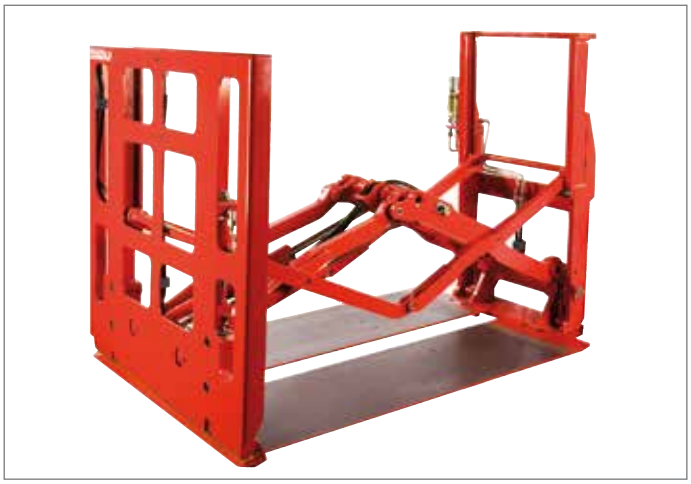

- Integral sideshifting for an easier load positioning.
- Platens feature smooth Weldox 700 steel and are easily adjusted by hand or by optional hydraulics.
- More power delivered to the payload with two stronger cylinders.
- Easy installation features.
- Quick disconnect lower hooks.
- ITA Class II and III mounting.

Easy Rider Fork-Mounted Push Pull

Ideal model for those companies where the handling of goods on slip sheets is not sufficient to justify the use of a dedicated fork lift truck.

- Thanks to an extremely quick and effective new fitting system, the Fork-Mounted Push Pull model Easy Rider offers the possibility to convert a conventional fork lift truck with forks into a specially equipped machine to handle loads on slip sheets. Increasing productivity without any compromise for safety.
- The driver just has to position the forks under the platens, tilt the mast forward, lift the carriage up, engage the upper hooks, lock the lower mounting hooks in place and connect the hydraulic couplers. These simple steps now make the Easy Rider ready for operation.
- Bolt-on platens can be adjusted to accomodate different overall widths.
- Quick disconnect lower hooks.
- ITA Class II and III mounting.

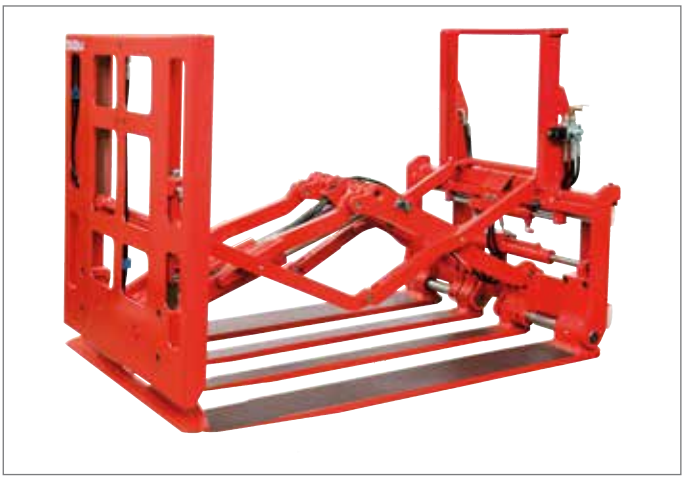

Mark 55™ Push Pull

The Mark 55 Push Pull is specifically designed to handle both slipsheeted and palletized loads. The Brudi Mark 55 Push Pull is also engineered to allow for four-way handling of the Mark 55 block pallet.

- The hydraulically adjustable outer platens slide on chromed bars allowing for both slip sheet and pallet handling.
- Adjustable platen inclination for tip alignment, to avoid load damage.
- Sideshifting function capability.
- Solenoid valve included.
- Four degree tilting push plate.
- Quick disconnect lower hooks are standard.
- ITA Class II mounting.

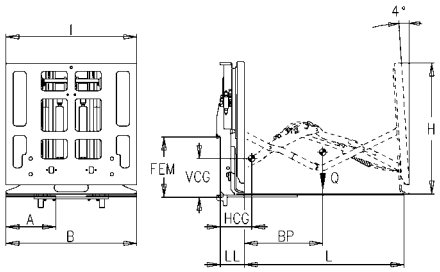

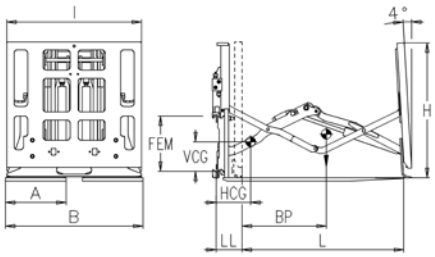

Outer platens closed for pallet handling.

Outer platens opened for slipsheet handling.

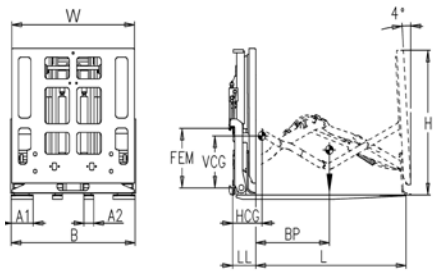

Easy Rider Fork-Mounted Push Pull

① *Please specify voltage when ordering.*

Notes: *(for Easy Rider Fork-Mounted Push Pull only)*

- One hydraulic function.
- Pressure relief valve.
- Adjustable bolt-on platens, to fit two different overall widths.
- Important: Easy Rider must be hooked on the carriage and supported by forks of suitable capacity.
- Hydraulic couplers are reccomended
- "Easy Rider" push pull must be installed on standard forks to properly support the load and attachment and hooked on the forklift carriage.
- Hydraulic dumper.

Notes: *(for Dedicated Push Pull only)*

- Hydraulic functions according to charts.
- Minimum carriage width 34" all models.
- 18" x 48" platens are available at no extra charge.
- Load push Hydraulic dumper
- QD lower hooks
- For models with Solenoid valve, spiral cable and control switch are include (please specify voltage)

Notes: *(for Dedicated Mark 55™ Push Pull only)*

- Solenoid valve is installed on all models. Hose reel/cable reel and switch are required for installation/connection.
- Hydraulic dumper
